PROFESSIONAL SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science (2026, CGPA: 8.04) with strong foundations in Python, SQL, and software development concepts. Hands-on experience through internships and academic projects involving computer vision, machine learning, and data analysis. Quick learner with strong communication skills, problem-solving abilities, and adaptability to new technologies.

EDUCATION

DMI College of Engineering, Chennai Bachelor of Technology (B.Tech) – Artificial Intelligence and Data Science — **CGPA:** 8.04 2022 – 2026

TECHNICAL SKILLS

Programming Languages: Python, SQL
Frameworks & Tools: Git, GitHub, Cursor,OpenCV, YOLOv8
Core Competencies: Computer Vision, Object Detection, Machine Learning, Data Analysis, Real-time Systems
Productivity & Analytics: Excel, Power BI
Soft Skills: Problem-Solving,Communication, Team Collaboration, Adaptability, Time Management.

INTERNSHIP EXPERIENCE

AI & ML Intern, MindfulAI Technologies 2025

- Contributed to AI development initiatives including data preprocessing, exploratory analysis, and model implementation across multiple projects.
- Collaborated with cross-functional teams using Git workflows and structured development practices to maintain code quality.
- Authored technical documentation and conducted research on emerging AI methodologies and best practices.

Trainee, Foxconn Private Limited 2024

- Operated in fast-paced manufacturing environment, ensuring compliance with Standard Operating Procedures and maintaining production schedules.
- Conducted quality assurance checks, identified process bottlenecks, and contributed to continuous improvement initiatives. **Embedded Systems with AI Intern, NSIC** 2023
- Gained hands-on exposure to embedded systems design and integration with AI applications for IoT solutions.
- Developed proficiency in technical documentation, project workflows, and industry-standard development practices.

ACADEMIC PROJECTS

Smart Intrusion Detection System Using Computer Vision

- Engineered a real-time surveillance application leveraging Python, OpenCV, and YOLOv8, achieving 92% mean Average Precision (mAP) with 24 FPS processing speed.
- Implemented advanced object detection algorithms to identify unauthorized persons and behavioral anomalies, reducing false-positive alerts by 40%.
- Designed automated alert mechanisms and monitoring dashboards to enhance security efficiency and response times.

Handwritten Digit Recognition System

- Developed and trained a Convolutional Neural Network (CNN) using TensorFlow/Keras for digit classification on the MNIST dataset.
- Implemented a comprehensive data preprocessing pipeline and hyperparameter optimization, achieving over 99% accuracy through iterative model refinement.

RELEVANT COURSEWORK

Database Management Systems, Data Structures, Algorithms, Artificial Intelligence, Software Engineering, Machine Learning Fundamentals, Deep Learning, Computer Vision

CERTIFICATIONS

- Introduction to Generative AI
- Claude Code 101 Certification – Anthropic
- SQL Bootcamp
- Automate Everything with n8n
- Certification Program in Service Desk Operations
