

NEXATECH

NexaTech Product Portfolio

DOC-PROD-001 • Version 2.2 • Owner: Product • Last Updated: 2026-07-20

Company Products

NexaTech provides B2B cloud software for workflow automation, analytics, and security operations.

NexaFlow

NexaFlow automates approval workflows, notifications, task routing, and business processes for enterprise teams.

NexaInsights

NexaInsights provides dashboards, scheduled reports, analytics, and customer-facing operational metrics. Project Beta is the current engineering initiative supporting this product.

NexaSecure

NexaSecure provides security monitoring, compliance workflows, alerting, and audit support.

Project Alpha

Project Alpha is the Enterprise AI Assistant initiative. Its objective is to let employees search internal knowledge and operational systems through a single conversational interface.

2026 Q3 Priorities

The highest engineering priority for Q3 is Project Alpha. Project Beta focuses on analytics performance. Security modernization remains an important operational initiative.

Project Alpha Technology

Project Alpha uses FastAPI, Python, LangGraph, PostgreSQL, Redis, ChromaDB, Docker, and AWS. The architecture supports specialized agents for RAG, SQL, web research, reflection, and reporting.

Success Measures

Key measures include retrieval accuracy, response latency, tool reliability, safe SQL execution, research factuality, and employee adoption.
